ABOUT ME

Master's graduate in Aquatic Biology, currently pursuing a second Master's in Genomics, Genetics, Epigenetics, and Evolution (GENE2) at Paris-Saclay University. Specialized in ichthyology and passionate about understanding the evolutionary mechanisms of fish species. I am seeking an internship and a PhD position starting in 2027 to contribute to advanced evolutionary genomics.

EDUCATION & TRAINING

- [1 Sep 2026 - Current]

Genetics, Genomics, Epigenetics and Evolutions master's degree
University de Paris-Saclay
- [1 Sep 2023 - 1 Sep 2025]

Aquatic biology Master's degree ranked 3rd out of 17 students
Université de Pau et des Pays de l'Adour
City: Anglet | **Country:** France | **Thesis:** Mechanisms involved in Arctic charr adaptive divergence: insights from ecology and genomics
- [1 Sep 2020 - 31 Aug 2023]

Biology bachelor's degree
Université d'Angers

WORK EXPERIENCE

- University of Iceland - Institute for experimental pathology**
City: Reykjavik | **Country:** Iceland
- [3 Mar 2025 - 3 Sep 2025]

Intern - supervisor: Kalina Kapralova
Movement behavior and genomic analysis of 4 morphs of Arctic charr in an icelandic lake
 - Built a de novo linkage map from RADseq data and performed QTL analysis across 92 individuals, identifying several genomic regions associated with parr marks phenotypic trait.
 - Analyzed acoustic telemetry data from 26 tagged individuals, revealing distinct habitat-use patterns between benthic and limnetic morphs
- IFREMER**
City: Anglet | **Country:** France
- [20 Sep 2024 - 8 Feb 2025]

Project co-leader - supervisor: Nathalie Caill-Milly & Claire Kermorvant
 - Co-designed and led a research project with a fellow student, under faculty supervision, to study the distribution and abundance of bivalve species in the Arcachon Bay
 - Applied random forest and regression tree methods combined with a hydrodynamic model, identifying substrate composition and temperature delta as key drivers of bivalve distribution

City: Tartas | **Country:** France

[29 Feb 2024 - 27 Jul 2024]

Intern - supervisor : Marion Escarpit

Monitoring of Pikeperch reproduction in the Landes region

- Monitored artificially created pikeperch spawning grounds throughout the spawning period using field observation and video monitoring
- Analyzed spawning data with random forest models and basic statistics, identifying temperature and luminosity as the main drivers of spawning timing

CEN Nouvelle-Aquitaine

City: Anglet | **Country:** France

[21 Sep 2023 - 10 Feb 2024]

Project co-leader - Supervisor : Yann Lalanne & Laurent Lanceleur

Supervised project on characterisation water quality of a river of a nature reserve

- Co-led a river water-quality assessment project with a fellow student, under faculty supervision, to evaluate the ecological impact of a man-made pond on a nature reserve river
- Analyzed water samples for biological, physical, and chemical parameters using standardized EU methods

LANGUAGE SKILLS

Mother tongue(s): French

Other language(s):

English

LISTENING: C1 **READING:** C1 **WRITING:** C1

SPOKEN PRODUCTION: C1 **SPOKEN INTERACTION:** C1

SKILLS

Bioinformatics/languages

Bash | R

Lab

DNA extraction | Fish dissection | Water quality (Physicochemical)

Writing

Zotero | Microsoft Word | Microsoft Excel | LaTeX

Field techniques

Electro fishing | Water sampling | Video monitoring | eDNA sampling

Quantitative

Population genetics | QTL analysis | Behavioral ecology | Statistical analysis | Linkage mapping | Ecological modeling
